

Workaround Batch Downloader Workspace

Add the following command line flag to your shortcut used to start Chrome

--disable-features=ChromeRootStoreUsed

1. Launch Google Chrome and paste the URL below on the address bar:

chrome://flags/#allow-insecure-localhost

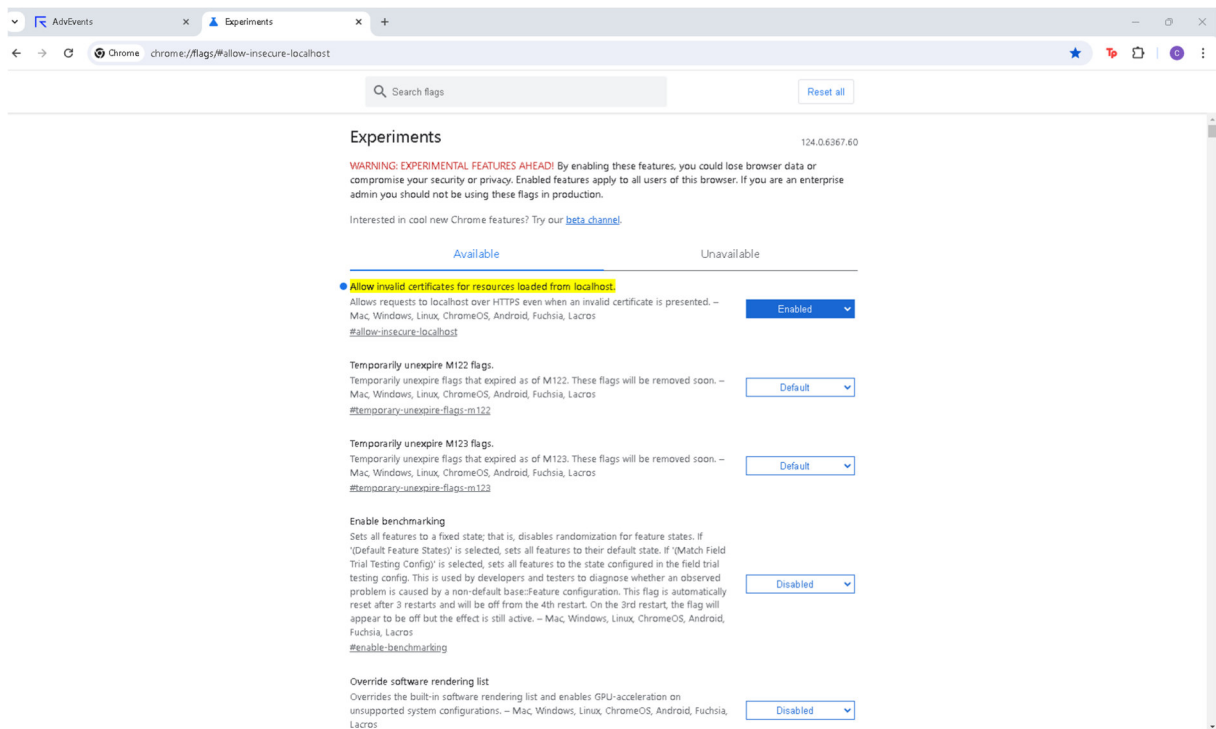

2. Search: " allow-insecure-localhost " and Enable it

3. Close Google Chrome

4. Relaunch Chrome then go to <https://workspace.refinitiv.com/web>

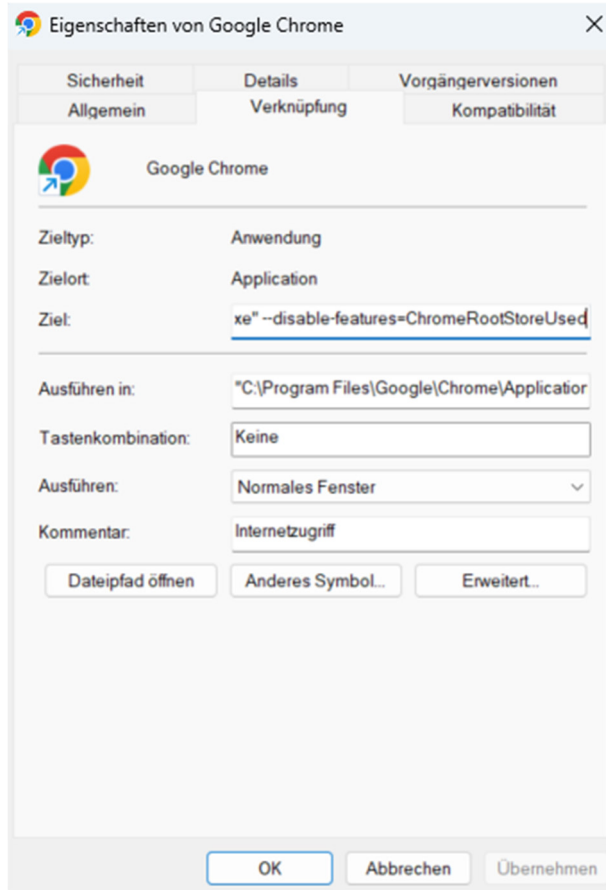

5. Log in with Refinitiv Workspace Web and test the batch print feature in ADVEV

Anbei die Screenshots dazu:

● **Allow invalid certificates for resources loaded from localhost.**

Allows requests to localhost over HTTPS even when an invalid certificate is presented. – Mac, Windows, Linux, ChromeOS, Android, Fuchsia, Lacros
`#allow-insecure-localhost`
